Published monthly

Scientific Translation Editor: R. C. GLASS, M.A., M.Sc., The City University, London

Translators: R. C. GLASS, Z. LERMAN, D. LOUVISH, E. L. SHORT, T. J. ZASTAWNIAK and R. L. ZNAJEK

Publishing and Advertising Offices:
Pergamon Press Ltd, Headington Hill Hall, Oxford, OX3 0BW, U.K.
Tel. (0865) 794141. Fax. (0865) 60285.
Pergamon Press Inc., 660 White Plains Road, Tarrytown, NY 10591-5153, U.S.A.

Subscription Rates

Annual Institutional Subscription Rate (1993) £1020.00 (US$1938.00)

Sterling prices are definitive. U.S. dollar prices are quoted for convenience only, and are subject to exchange rate fluctuation. Prices include postage and insurance and are subject to change without notice.

Subscription enquiries from customers in America should be sent to:
Pergamon Press Inc., 660 White Plains Road, Tarrytown, NY 10591-5153, U.S.A., and for the remainder of the world to:
Pergamon Press Ltd, Headington Hill Hall, Oxford OX3 0BW, U.K.

Second class postage paid at RAHWAY, NJ. Postmaster send address corrections to *Computational Mathematics and Mathematical Physics*, c/o Pergamon Press Inc., 660 White Plains Road, Tarrytown, NY 10591-5153, U.S.A.

Microform Subscriptions and Back Issues

Back issues of Pergamon journals, both in hard copy and on microform, are available direct from Pergamon Press offices.

VOLUME CONTENTS

VOL. 31, NO. 1 — 1991

L. A. KNIZHNERMAN	1	Calculation of functions of unsymmetric matrices using Arnoldi's method
F. V. LUBYSHEV	10	Approximation and regularization of optimal control problems for a non-selfadjoint elliptic equation with variable coefficients
T. JANKOWSKI	21	Numerical solution of two-point boundary-value problems for retarded differential equations
T. ZHANLAV	28	A high-accuracy three-point spline scheme
YU. B. SURIS	36	Preservation of integral invariants for the numerical solution of systems of the form $\ddot{x} = K\dot{x} + f(x)$
V. A. KOZLOV, V. G. MAZ'YA and A. V. FOMIN	45	An iterative method for solving the Cauchy problem for elliptic equations
N. YU. BAKAYEV	52	On the stability of differencing schemes with smoothing operators
DZH. A. BABAYEV and S. S. MARDANOV	60	A parallel algorithm for linear programming problems
G. A. VIRNOVSKII	67	Design of petroleum well flooding systems by methods of optimal control theory
P. A. KRUTITSKII	75	The application of S. A. Gabov potentials in semiconductor physics
S. V. PEREVERZEV and S. G. SOLODKII	85	On the choice of basis functions for the approximate solution of Peierls equations
S. A. IVANOV and V. G. KORNEEV	92	The problem of the thermal emission of a shell taking internal reflection into account
S. I. GUROV	101	The reduction of general Boolean functions to monotonic form
		Short Communications
A. M. LEVIN	106	An iterative algorithm for determining the regularization parameter in the method of least discrepancy estimation
V. A. KOMAROV and K. E. PEVCHIKH	109	A method of approximating attainability sets for differential inclusions with a specified accuracy
A. I. ZADORIN and V. I. IGNAT'YEV	112	Numerical solution of quasilinear second-order singularly perturbed equation
M. B. TVERSKOI	116	New classes of solutions of a non-linear operator equation describing the steady flow of a floating liquid over an uneven bottom
A. N. ERMILOV, V. I. KABANOVICH and A. M. KURBATOV	120	Recursive definition of Green's functions of difference equations
M. B. AIDARKHANOV	123	Some metric properties of the space of classifications

VOL. 31, NO. 2 — 1991

L. V. BAD'IN and R. P. TARASOV	1	Numerical factorization of polynomials on the unit circle and the approximate solution of discrete Wiener–Hopf equations
V. A. ZHELUDEV	11	Local smoothing splines with a regularizing parameter

A. A. Abramov, A. L. Dyshko, N. B. Konyukhova and T. V. Levitina — 25 Computation of radial wave functions for spheroids and triaxial ellipsoids by the modified phase function method

V. K. Gorbunov — 42 Regularization of extremal problems

Yu. I. Mokin — 52 Filling a differencing-scheme matrix for two-dimensional integral equations of potential theory

A. I. Fedotov — 61 The convergence of a quadrature-differencing method for linear singular integrodifferential equations with discontinuous coefficients

I. D. Turetayev — 69 Investigation of projective differencing schemes for the Bone–Smith and Burgers–Korteweg–De Vries equations

I. V. Yegorov and O. L. Zaitsev — 80 An approach to the numerical solution of the bidimensional Navier–Stokes equations using the direct calculation method

A. E. Kuznetsov, M. Kh. Strelets and M. L. Shur — 89 Calculation of stationary spatial flows of viscous gases and chemically reacting gas mixtures

Short Communications

A. B. Samokhin — 102 The multi-step method of minimal discrepancies for solving linear equations

V. Ya. Tereshchenko — 105 A variational-difference scheme for realizing the duality algorithm in problems of minimizing the generalized Trefftz functionals

A. G. Sveshnikov, S. T. Simakov and J. Marin Antunia — 109 Unsteady oscillations of a viscous compressible fluid with spatially periodic excitation

A. A. Makhmudov and S. P. Popov — 114 Numerical scheme for the boundary-layer equation with self-induced pressure

VOL. 31, NO. 3 1991

A. S. Il'inskii and E. Yu. Fomenko — 1 Investigation of infinite-dimensional systems of linear algebraic equations of the second kind in waveguide diffraction problems

A. G. Perevozchikov — 11 A method for approximating the pseudogradient mapping of a linked-maximum function

S. M. Aliakbarov and F. P. Vasil'yev — 19 Regularization of unstable two-level problems of the standardization type

V. G. Prikazchikov — 26 Asymptotic estimate of the accuracy of the discrete spectral problem of a fourth-order equation

Yu. G. Bulychev and S. A. Pogonyshev — 32 Simulation of stochastic evolution equations in discrete bases

K. T. Mynbayev — 37 On the method of mechanical quadratures for Fredholm's integral equation in an unbounded domain

J. J. Velazquez, V. A. Galaktionov and M. A. Herrero — 46 The space structure near a blow-up point for semilinear heat equations: a formal approach

V. N. Koterov and A. V. Shcheprov — 56 Calculation of spatially non-equilibrium electron transfer in a gas-discharge plasma

A. S. Kalashnikov — 64 On the diffusion of impurities with long-range action

A. V. Latyshev — 73 Analytical solution of the Boltzmann equation with a collision operator of the mixed type

Short Communications

M. N. Kotov — 82 A regularizing quadrature formula for typical divergent integrals of the Green's function method

A. V. Reztsov — 84 Estimating the number of interpolation points for Gaussian-type cubature formulae

L. I. MINCHENKO — 86 Calculation of directional derivatives in max–min problems with linear constraints

M. S. INERBAYEV — 89 Difference schemes with additional unknowns for quasilinear Sobolev equations

U. G. ABDULLAYEV — 93 Peaking regimes in problems for the quasilinear equation of heat and mass transfer with convection

S. A. KASHCHENKO — 97 The asymptotic form of spatially non-uniform structures in coherent non-linear optical systems

YU. M. MIKHEYEV — 102 A cyclic method for channel routing

VOL. 31, NO. 4 — 1991

A. A. ABRAMOV — 1 A method for solving ill-conditioned systems of linear algebraic equations

S. A. SHISHKIN — 7 Extending the potentialities of matrix inversion procedures

R. P. TARASOV — 16 The $\lambda^{(n)}$-transformation and digital signal processing algorithms in the algebra of formal polynomials

R. VULANOVIC — 28 A second order numerical method for non-linear singular perturbation problems without turning points

V. F. BUTUZOV and V. YU. BUCHNEV — 37 The asymptotic behaviour of the solution of a singularly perturbed two-dimensional problem of the reaction-diffusion-transport type

D. V. STRUNIN — 45 On the randomization of the oscillations of the combustion front of condensed systems with melting

T. V. KUPRIYANOVA, YU. YA. MIKHAILOV and A. YU. CHINILOV — 50 The construction of an approximate conservative problem on the decay of an explosion in the case of an equilibrium gas

V. G. GRUDNITSKII, V. N. PODOBRYAYEV and V. N. RYGALIN — 57 The main scheme and numerical simulation of the flows in a gas-dynamic window with a large pressure drop

I. L. SOFRONOV — 66 A rapidly converging method for solving the Euler equation

YU. D. PLETNER — 79 The fundamental solution of the equation of internal waves and some initial-boundary value problems

N. S. VASIL'YEV — 88 The problems of controlling the routing of connections in data transmission networks

Short Communications

V. G. PRIKAZCHIKOV — 97 An asymptotic estimate of the accuracy of a discrete spectral problem

V. A. LYUL'KA and I. A. RUMYANTSEV — 101 Grid interpolation with a linear curvature-change rule

A. V. IL'IN and N. G. TIMASHOVA — 103 A method for determining noise level using the discrete Lyapunov exponent

S. K. ZAVRIYEV and A. G. PEREVOZCHIKOV — 107 A stochastic finite-difference algorithm for minimizing a maximin function

M. A. BRUTYAN and P. L. KRAPIVSKII — 111 The stability of periodic three-dimensional viscous fluid flows

A. V. SCHEPROV — 115 Letter to the Editor

VOL. 31, NO. 5 — 1991

V. YA. ARSENIN and A. V. KRYANEV — 1 A generalized maximum-likelihood method for solving finite-dimensional ill-posed problems

U. FELGENHAUER — 8 On stable convergence of secant methods with projected updates

V. V. BARANOV — 16 Computational methods of optimal stochastic control. Optimality principle and successive-approximation optimization scheme

A. G. PEREVOZCHIKOV — 28 The approximation of generalized stochastic gradients of random regular functions

T. V. LEVITINA — 34 The conditions of applicability of an algorithm for solving two-parameter self-adjoint boundary-value problems

G. Z. TSERTSVADZE — 40 On the convergence of difference schemes for the Kuramoto–Tsuzuki equation and reaction–diffusion type systems

V. A. VORONINA — 47 A theorem of the existence of a solution of the system of kinetic equations for a relativistic beam

S. I. SMAGIN and V. A. TSETSOKHO — 56 Numerical solution of the problem of the diffraction of electromagnetic waves by three-dimensional inclusions

S. A. VAKULENKO — 68 The existence of chemical waves with a complex motion of the front

YU. D. PLETNER and L. V. TVERSKAYA — 76 On the problem of the oscillations of a rotating stratified fluid excited by a plane two-sided disc

M. YA. IVANOV and V. G. KRUPA — 83 An implicit non-factorization method for computing turbulent flows of viscous heat-conducting gas in turbomachine cascades

A. M. LATYPOV and A. V. SHIPILIN — 92 On an iterational method for calculating sub- and transonic internal flows

Short Communications

I. P. RYAZANTSEVA — 99 The minimum-residue principle in non-linear monotonic problems

A. I. FEDOTOV — 103 On the convergence of a quadrature-difference method for non-linear singular integrodifferential equations

O. YU. GRITSENKO and E. G. SHIFRIN — 109 Computing singular solutions in elliptic boundary value problems

S. G. KARATAYEV and V. N. KOTEROV — 112 Solution of an inverse problem for internal flows of a viscous gas with a supersonic kernel

N. N. APRAUSHEVA — 115 The method of quasi-contractive mappings and its use for cluster detection

VOL. 31, NO. 6 — 1991

S. A. SHISHKIN — 1 An algorithm for inverting non-singular matrices with guaranteed accuracy

A. S. MECHENOV — 6 Partially approximate systems of linear algebraic equations

E. M. KISELEVA and N. Z. SHOR — 13 The solution of the continuous optimal decomposition problem with incomplete initial data

I. L. AVERBAKH — 21 An iterative method of solving two-stage discrete stochastic programming problems with additively separable variables

A. A. ABRAMOV — 27 A method of finding the eigenvalues and eigenfunctions of a self-conjugate differential problem

G. M. VAINIKKO — 37 A piecewise-constant approximation of the solutions of multi-dimensional weakly singular integral equations

V. A. GUSHCHIN and A. N. KOPYSOV — 51 The dynamics of a spherical mixing zone in a stratified fluid and its acoustic radiation

YU. I. KRUTIN, YU. A. TUCHKIN and V. P. SHESTOPALOV — 60 Regularization of the boundary-value problem of diffraction by a semi-transparent grating of bars of arbitrary cross-section with Dirichlet boundary condition

B. A. VOLODIN and A. M. KHAPAYEV — 69 An exact solution of the relativistic Klein–Gordon wave equation

I. P. GAVRILYUK, V. L. MAKAROV and N. A. ROSSOKHATAYA — 76 — A mathematical model of a variable-band semiconductor diode with re-emission

YU. N. KISELEV, I. V. NEMCHINOV and V. V. SHUVALOV — 87 — Mathematical modelling of the propagation of intensely radiating shock waves

Short Communications

KH. D. IKRAMOV — 101 — Computing the eigenvalues of skew-symmetric matrices

S. L. LOGUNOV — 104 — Stability estimates for solutions of some conditionally well-posed problems over a set of functions satisfying a Hölder condition

M. A. AL'SHANSKII, I. V. MEL'NIKOVA and A. YU. FREIBERG — 108 — Numerical implementation of the boundary-value problem method for the regularization of ill-posed problems

L. V. BORODACHEV — 112 — An implicit approximation of the equations of motion of Darwin's model of a plasma

VOL. 31, NO. 7 — 1991

A. L. AGEYEV — 1 — Algorithms for the finite-dimensional approximation of stabilizing corrections

A. A. ABRAMOV, L. M. ALVAREZ, R. GONZALES-FELIPE and A. R. RODRIGUES — 8 — Some possibilities of the method of operator splitting

V. V. POSPELOV — 14 — The method of optimal descent along basis elements for solving singular systems of linear algebraic equations

V. L. DRUSKIN and L. A. KNIZHNERMAN — 20 — Error bounds in the simple Lanczos procedure for computing functions of symmetric matrices and eigenvalues

V. S. LETYAGIN, T. G. LEVINA and I. D. SAVINSKII — 30 — Interpolation, smoothing, and "outlier" detection based on the solution of integral equations of the first kind

A. F. FILIPPOV — 37 — Using a computer to obtain strict bounds on solutions of differential equations

M. P. BELYANIN and A. G. NIKITIN — 46 — Asymptotic investigation of a model of a diode with highly doped contact regions

A. I. GLUSHKO and I. I. NESHCHERETOV — 56 — The diffraction of a longitudinal wave by a cylindrical cavity: behaviour of the solution at large times

N. E. GOLYANDINA — 63 — Some functional inequalities and the rate of convergence of Markov chains to the boundary

T. G. ELIZAROVA and YU. V. SHERETOV — 72 — The invariant form and asymptotic properties of a generalized quasi-gas-dynamic system

YU. B. LIFSHITS and V. S. SAKOVICH — 79 — An iterative-marching scheme for calculating the flow round three-dimensional surfaces at low supersonic velocities

A. V. POPOV — 89 — Investigation of an economic finite-difference method for the bidimensional equations of a viscous heat-conducting gas

Short Communications

V. F. BONDARENKO — 101 — The efficient summation of Schloemilch series of cylindrical functions

L. V. BABUSHKINA, M. K. KERIMOV and A. I. NIKITIN — 105 — Tables of Hankel functions in the complex domain

M. G. GIORGADZE and A. D. MYSHKIS — 107 — On the isoperimetric extremum of an eigenvalue

F. V. SRUMOVA — 110 — Resonant properties of energy radiated by randomly-positioned sources of oscillation

V. V. ARISTOV, A. P. KRYUKOV, F. G. CHEREMISIN and I. N. SHISHKOVA — 111 — Solution of the Boltzmann equation for plane jet flow with condensation on cryopanels

G. P. Panesenko — 116 Asymptotic solutions of the system of equations of elasticity theory for rods, rod constructions and frame structures

VOL. 31, NO. 8 — 1991

Kh. D. Ikramov — 1 The conditions for the reducibility and canonical forms of Hamiltonian matrices with pure imaginary eigenvalues

A. M. Vigodner and A. A. Pervozvanskii — 6 A modification of the conjugate-gradient algorithm for the stable solution of an ill-conditioned problem by the method of least squares

A. V. Lipin and E. V. Sedunov — 18 Optimization of a Monte-Carlo experiment of functionals in a Hilbert space

S. V. Gnevko and A. I. Kalinin — 28 Asymptotic optimization of nonlinear regularly perturbed control systems

R. G. Strongin — 37 Parallel multiextremum optimization using a set of Peano curves

I. P. Borovikov — 46 The uniqueness of the solution of an inverse problem for the wave equation

Yu. I. Mokin — 51 Economic methods of calculating the surface potentials of simple and double layers

A. V. Latyshev and A. A. Yushkanov — 58 The theory and accurate solutions of problems of the slip of a binary gas along a plane surface

S. L. Logunov — 65 Stability estimate in the Skorokhod metric for the dynamical seismic exploration problem

S. T. Gribnyak, A. V. Logvinenko, V. N. Romanenko, A. Yu. Fedorovich and A. A. Ennan — 74 Numerical investigation of the two-dimensional potential flow of an ideal fluid using the Schwarz–Christoffel integral

O. L. Chernykh — 80 Construction of the convex hull of a finite set of points using triangulation

V. P. Kozlov and S. V. Svistunov — 87 Modification of the Fedorov–Wynn procedure for determining the elliptic span of a given system of vectors

Short Communications

I. L. Osipov — 92 Generation of interpolation curves with nonstandard combinations of derivatives at the ends of interpolation intervals

M. V. Noskov — 95 Some analogues of Morrow–Patterson cubature formulas

L. V. Babushkina, M. K. Kerimov and A. I. Nikitin — 98 Tables of spherical Bessel functions of the third kind in the complex domain

A. I. Litvin and S. D. Simonzhenkov — 100 Computation of Fermi–Dirac functions

VOL. 31, NO. 9 — 1991

V. G. Bel'skii — 1 A multigrid method for solving variational inequalities

V. P. Shutyayev — 8 Computation of a functional in a certain non-linear problem using the adjoint equation

N. M. Novikova — 16 Iterative regularization of a penalty method for an infinite-dimensional saddle-point search problem

Yu. G. Bulychev — 28 Methods for the numerical–analytical integration of differential equations

A. V. Nesterov — 39 On the asymptotic form of the solution of a parabolic equation with a singularly perturbed boundary condition

O. N. BULYCHEVA, A. B. VASIL'YEVA and V. G. SUSHKO — 45 — Small-parameter asymptotic expansions of the solutions of some problems for parabolic equations

B. I. BEREZIN and V. G. SUSHKO — 53 — Small-parameter asymptotic expansions of the solution of a degenerate problem

N. N. POPOV and V. M. SOLODOV — 57 — An algorithm for solving parabolic evolution equations

D. A. LYUBIMOV — 65 — An efficient method for calculating the spatial flow around air intakes at transonic velocities

A. S. EDIGAROV — 76 — Numerical calculation of the turbulent flow of a cold heavy gas in the atmosphere

A. A. FROLOVA — 84 — Computation of radiating gas flow in axially symmetric nozzles of a given shape

L. G. VOLKOV — 92 — The construction of completely conservative difference schemes for the equations of the nonlinear theory of elasticity

Short Communications

I. I. LUKHANIN — 99 — An efficient algorithm for multiplying a large circulant matrix by a column

L. ATANASSOVA and I. MAKRELOV — 104 — Individual and simultaneous determination of the zeros of algebraic polynomials

V. A. IVANOV and R. Z. SAMERKHANOV — 107 — The solution of the nonlinear eigenvalue problem in problems of mathematical physics

M. V. NOSKOV — 110 — Cubature formulas for functions periodic in some variables

S. G. KARATAYEV and V. N. KOTEROV — 114 — Solving the direct and inverse problems for internal supersonic viscous gas flow with volume heating

VOL. 31, NO. 10 1991

A. S. LEONOV — 1 — The minimum pseudo-inverse matrix method: theory and numerical implementation

K. V. PENZIN — 14 — A version of the Levenberg–Marquardt algorithm for solving a non-linear least-squares problem

S. V. PEREVERZEV and M. A. SINENKO — 20 — The optimal rate of convergence of the KP-method and some of its generalizations

N. M. POPOV — 26 — Two-level global and multicriterion search schemes

Z. KAMONT and K. PRZADKA — 37 — Difference methods for first-order partial differential-functional equations with initial-boundary conditions

A. V. BUNYAKIN — 47 — Singular points of the solution of a system of Lorenz differential equations

G. I. SHISHKIN — 53 — A grid approximation of singularly perturbed parabolic equations degenerate on the boundary

YU. D. PLETNER — 64 — The properties of the solutions of equations similar to the two-dimensional Sobolev equation

A. YU. DANILENKO — 74 — Solution of the Neumann problem for Poisson's equation by the multigrid method in the three-dimensional case

YU. A. YEREMIN and A. G. SVESHNIKOV — 81 — Quasisolution of vector problems of diffraction by screens based on iterative methods

A. V. SUNDUKOVA — 87 — Fundamental solution of the gravitational–gyroscopic wave equation and the solvability of the internal and external Dirichlet problems

L. G. VOLKOV — 93 — The conservation laws of gas dynamics in Lagrange variables

V. A. VORONINA 102 A stochastic algorithm for solving the initial-boundary value problem for the Boltzmann equation

Short Communications

A. I. ZHDANOV 109 Calculation of pseudosolutions of ill-posed linear stochastic algebraic equations

A. M. GRIGORYAN 112 An algorithm for computing a two-dimensional discrete Fourier transform of arbitrary order

M. G. NEIGAUZ 117 On the method of slow combinations for the equations of chemical kinetics

V. N. KUZNETSOV and G. A. SPIRIDONOV 120 On the choice of the initial approximation in problems involving the calculation of the thermodynamic properties of substances

I. E. KUL'PINA and A. YU. SHCHEGLOV 123 A method of solving the problem of optimizing the operation of an industrial complex

M. V. KOZLOVA and G. P. PANASENKO 128 Averaging of the three-dimensional problem of elasticity theory for an inhomogeneous rod

V. I. KABANOVICH and A. M. KURBATOV 131 An algorithm for computing the potential of a simple random walk on a cubic grid

VOL. 31, NO. 11 1991

N. M. NOVIKOVA 1 Some methods for numerical solution of continuous convex stochastic optimal control problems

M. E. MAZUROV 11 Solution of diophantine inequalities in problems of the synchronization of relaxation oscillations

L. T. POZNYAK 24 A partial truncation procedure in the partial domain method for computing the eigenvalues of the two-dimensional Laplace operator

P. N. VABISHCHEVICH 37 Approximate solution of the modified Dirichlet problem

V. D. LISEIKIN 47 The construction of regular grids on n-dimensional surfaces

A. S. IL'INSKII and O. M. MASLOVSKAYA 57 The finite element method in the problem of diffraction by a periodic structure

A. A. CHARAKHCH'YAN 63 Symmetric and asymmetric splitting schemes for the equations of gas dynamics

G. L. KOROLEV 73 Flow separation and the non-uniqueness of the solution of the boundary-layer equations

V. I. ZHUK 80 Asymptotic form of the upper branch of the neutral curve at subsonic and transonic velocities of the external flow

M. YA. KOVALYEV 92 Minimization of the weighted sum of overdue customers in a single-server system

Short Communications

I. YA. TSURKIS 98 The solution of infinite systems of linear equations by the reduction method

A. P. TISHIN and G. P. SHINKIN 103 Local polynomial splines with displacement

YU. I. MOKIN 106 Spectral equivalence of difference-scheme matrices for two-dimensional integral equations of potential theory

I. V. SAVENKOV 111 The development of wave packets in a three-dimensional boundary layer

VOL. 31, NO. 12 1991

YU. N. KISELEV and M. V. ORLOV	1	Numerical algorithms for linear time-optimal controls
S. M. ALIAKBAROV and F. P. VASIL'YEV	7	Dynamic programming method for a standardization problem with a piecewise-linear objective function
V. V. BARANOV	15	A parametric stochastic optimal control problem
S. S. KHRAMKOV	26	The accuracy of recognition for estimator-computing algorithms
G. I. SHISHKIN	33	Grid approximation of a singularly perturbed boundary-value problem for a quasi-linear elliptic equation in the completely degenerate case
V. B. GLASKO and A. V. SHCHEPETILOV	47	An inverse problem of technology and the uniqueness of its solution
A. D. SARIYEV and G. M. SYDYKOV	53	On the correctness "on the whole" of certain inverse transport problems in a multizone space
A. A. ABRAMOV, A. S. KRAVCHUK and V. V. PODLUBNYI	64	Statistical modelling of the surface discharge of a gas into the approach stream
V. N. GOLUBKIN and V. V. NEGODA	70	Optimization of the spatial shape of load-carrying bodies of small elongation at hypersonic velocities
A. A. SAPOZHENKO	79	The search for a maximum upper zero of a monotone function on ranked sets
S. V. SVISTUNOV	90	An algorithm for the parametric search for elliptic I- and S-hulls of a convex compact set
		Short Communications
KH. D. IKRAMOV	99	The biorthogonal algorithm as the Lanczos method in a metric with indefinite sign
A. O. ALEKSEYEV	101	The minimax problem of M travelling salesmen
S. I. LYASHKO	107	The approximate solution of a pseudoparabolic equation
